

PRODUCT UPDATE:

ALLIGATOR SENS.IT RS-SERIES SENSORS COVER JEEP VEHICLES WITH TPMS AUTO-LEARNING

Alligator sens.it RS & sens.it RS+ universal TPMS sensors now cover various new Jeep vehicles with 2nd-gen auto-learning Continental sensors, introduced on the 2021 Gladiator, Grand Cherokee L, Wrangler and 2022 Grand Cherokee, Grand Wagoneer & Wagoneer.

The truck & SUVs are now a part of Fiat-Chrysler's lineup of vehicles that support TPMS automatic learning and utilize advanced auto-learning technology - the body computers utilize data from both the TPMS sensors and ABS system to automatically locate and store new sensor IDs quickly, which reduces the driving time for registering new sensors compared to simpler systems.

If a scan tool isn't available for sensor-ID registration, then simply park the vehicle for 20 minutes and drive until the pressures for the new tires show up on the display.

Using sensors that have an auto-learning feature is especially helpful for DIYers that install wheels themselves but don't have access to a scanner for registering the new IDs and for wheel shops that rely on the end-users to handle the TPMS learning process.

The sensor also supports location detection, so when rotating tires, there's no need to reset the system manually - simply follow the same procedure as auto-learning and the display will show the new locations on the dash after driving for a few minutes.

Shops that use Alligator TPMS sensors are working with a part that supports the full range of OE features which makes the techs' jobs easier, reduces unnecessary down-time in the bays for TPMS learning or sensor issues, helps the business' bottom line, and keeps its customers happy and coming back.

When replacing OEM sensors with aftermarket units, rest assured that TPMS sensors from Alligator will provide the same functionality that the vehicle offers! Regardless of the tool that's used to program the sensors, this car should be available for programming after completing the latest update.
