

PRODUCT UPDATE:

## ALLIGATOR SENS.IT RS-SERIES TPMS COVERS NISSAN NV FULL-SIZE VANS

Alligator sens.it RS & sens.it RS+ universal TPMS sensors now cover the Nissan NV vans (1500, 2500 & 3500), which were offered by Nissan for the model years 2012-21.

The sensor software is specially designed to handle the high pressures that the van's wheels & tires use.

Shops now have the option to use their in-stock sens.it sensors for the high-payload vans and won't have to visit a dealership to pick-up the parts nor pay the full list price for them.

The new coverage is part of Wegmann's effort to continuously add value to the Alligator sensors by releasing new vehicle applications so that the parts never go obsolete.

Shops that use Alligator TPMS sensors are working with a part that supports the full range of OE features which makes the techs' jobs easier, reduces unnecessary downtime in the bays for TPMS learning or sensor issues, helps the business' bottom line, and keeps its customers happy and coming back.

When replacing OEM sensors with aftermarket sensors, rest assured that RS series TPMS sensors from Alligator will provide all the functionality that the vehicle delivers! Regardless of the tool that's used to program the sensors, these vehicles should be available for programming after completing the latest update.

**sens.it®**  
It Just Makes Sense.
