

## PRODUCT UPDATE: **ALLIGATOR SENS.IT RS-SERIES TPMS COVERS LAND ROVER & JAGUAR AUTO-LEARNING VEHICLES**

Alligator sens.it RS & RS+ universal TPMS sensors now cover new Land Rover/Jaguar vehicles with automatic-learning systems (Jaguar: E-Pace, F-Pace, F-Type, I-Pace, XE, XF, XJ, XJR & Land Rover: Defender, Discovery, Discovery Sport, LR4, Range Rover, Range Rover Sport, Evoque & Velar).

The vehicles are part of a growing number of models that historically supported simpler auto-learning schemes (LF-initiator based, etc) but now have more advanced systems - the tire pressure sensors on the newer models work with the ABS system to automatically locate and store new sensor IDs quickly, so the driving time can be reduced after installing new parts.

If no scan tool is available for manual sensor ID registration, then simply drive the vehicle until the pressures for the new tires show up on the display or until the TPMS warning light clears. Sensors that have an auto-learning feature are especially helpful for DIYers that install wheels themselves but don't have access to a special tool for new sensor ID registration and for wheel shops that rely on the end-users to handle the TPMS learning process.

The sensor also supports location detection, so when rotating tires, there's no need to reset the system manually - simply follow the same procedure as auto-learning and the display will show the new sensor locations after driving for a few minutes.

Shops that stock Alligator sens.it sensors are utilizing user-friendly TPMS units which make the techs' jobs easier, reduces unnecessary downtime in the bays for TPMS learning or sensor issues, helps the business' bottom line, and keeps its customers happy and coming back. Wegmann will continue to add value to the RS series TPMS sensors from Alligator by adding coverage for different vehicle applications so that the product never goes obsolete.

When replacing OEM sensors with aftermarket units, rest assured that RS series TPMS sensors from Alligator will provide all the functionality the vehicle delivers!

Regardless of the tool that's used to program the sensors, these vehicles should be available for programming after completing the latest update.

**sens.it®**  
It Just Makes Sense.
